Profile Summary

I'm a recent IT graduate with a strong interest in web development. I've built real-world projects using the MERN stack (MongoDB, Express.js, React.js, and Node.js), including a food delivery website and a freelance blog app. I enjoy learning new things, solving problems, and working on projects that can help people. I'm looking for a developer role where I can grow my skills and contribute to a team.

Skills

React | React Native | JavaScript | Nodejs | Express Js | MongoDB | Postman Automation | Sql

Work Experience

MERN Stack (Freelance Project) - <https://gentlereminder.app/>

Great Manager Institute, Mumbai

10-2024 - 01-2025

- Built a full-stack MERN blog app with motivational reminders, post sharing, and filtering features.
- Integrated image compression and UTM-based analytics for engagement tracking.
- Managed the full SDLC: requirement gathering, coding, testing, and deployment.
- Optimized MongoDB queries for performance and reliability.

Projects

1. Food Delivery Website with Scheduling System | <https://aai-loves-tiffin.vercel.app/>

Worked as a full-stack developer in a team of five to build a food delivery web application using the MERN stack. The platform allows users to create customizable meal plans and schedule deliveries based on their preferences. I was responsible for creating RESTful APIs using Node.js and Express, managing the database with MongoDB, and building a responsive user interface using React and Tailwind CSS. We followed Agile methodologies, participated in daily standups, and collaborated closely during sprint cycles to ensure smooth and timely development.

2. Learning Management System | <https://full-stack-lms-xi.vercel.app/>

Built a full-featured Learning Management System (LMS) that enables instructors to create and manage courses, and students to enroll, learn, and track their progress. Implemented secure user authentication using JWT with role-based access for admins, instructors, and learners. Developed a responsive frontend using React and Tailwind CSS, featuring dynamic course pages, interactive video playback, and rich text support for course content. On the backend, designed RESTful APIs with Express and MongoDB, including functionalities like course creation, video and quiz management, enrollment handling, and real-time progress tracking. Integrated Cloudinary for secure media uploads and storage. The platform also includes features like a quiz system, progress dashboards, and admin-level course approvals to ensure content quality.

Education & Certification

Ramanand Arya Dav College | BSC-IT | CGPA - 9.2

06-2021 - 04-2024

Ramanand Arya Dav College | HSC | 90.67%

06-2020 - 03-2021

Advanced Web & UI/UX | Magic Foundation | <https://lnk.ink/dIEjX>

11-2024 - 02-2025

SQL | MongoDB | <https://shorturl.at/RKxkj>

05-2024 - 09-2024
