PROJECT

1.Food Delivery Website with Scheduling System :(https://aai-loves-tiffin.vercel.app/)
Role: Full-Stack Developer (Team of 5)

Developed a full-featured food delivery website using the MERN (MongoDB, Express.js, React.js, Node.js) stack. Worked collaboratively with a team of 5 to deliver a robust, user-friendly platform that integrates a dynamic scheduling system for meal deliveries. Key highlights of the project include:

Scheduling System: Implemented a flexible delivery scheduling system, allowing users to select meal options, delivery times, and durations with multiple customizations (e.g., meal plans, number of meals, and start dates).

Backend Development: Built scalable RESTful APIs to handle meal plan management, user orders, and schedule tracking. Integrated MongoDB for efficient data storage and retrieval.
Team Collaboration: Worked in an Agile environment, actively participating in code reviews, daily standups, and sprint planning, ensuring smooth development progress.

Technology Stack: React.js, Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, Git.

2.Freelance Project : https://gentlereminder.app/
GentleReminderApp
The "GentleReminderApp" is a blog website where users can upload posts, share their blogs, and receive daily reminders about motivational blogs.

- Completed assigned development tasks efficiently and on time.
- Worked with [MERN Stack, e.g., React, Node.js, MongoDB, etc.].
- Implemented a feature such as [filter options, image compression functionality, and added userId in UTM parameter to check most shareId
- Ensured code quality and functionality through testing and debugging.

EDUCATION

Bachelor of Science in Information Technology (2021- 24)

Ramanand Arya Dav college, Bhandup, Mumbai

HSC from "Ramanand Arya Dav college" Maharashtra State Board in 2021 with 91%.

SSC from "st.Agrasen High School & jr.college " Maharashtra State Board in 2019 with 79%.

EXTRA CURRICULAR AND PARTICIPATION

As part of coding bootcamp program, I had :
- Built Reactjs and MERN stack applications
- Built RESTful APIs with Node.js and Express.js.
- Tech Stack - React, HTML, CSS, Javascript, Node.js, Express.js, MySQL,
- MongoDB, GIT.
